Vanguard[®] Final Pitch

Cami Crocker, Gracie Elliott, Abram Gregory, Garrett Haynes, Dabney Hughes

The Mindset Shift

You ask: **"Should I really be spending?"**

The Pitch

Our Big Idea

A monthly **retirement paycheck** and **readiness score**.

The Gap

The Pain Point

Users can see their portfolio but don't know **what it means** for them in real life.

The Solution

Translating an abstract balance into a tangible spending number best **matches user intent**.

Living off your money > tracking it

The Context

Shifting from growing wealth to learning
how to live off it.

Ages 50-59

Retired or near
retirement

Mixed financial
literacy levels

The Problem

Users lack **clarity** on what their portfolio means for *them*.

The Solution: Retirement Paycheck & Readiness

Delivers
a clear "on track" signal

Simplifies
real outcomes
from holdings

Translates
investments into
monthly "paycheck"

The Goal

We want users to move from second-guessing purchases to spending against a **defined monthly paycheck**.

Confidence in financial decision-making
builds trust in the Vanguard brand.

Why This Works: Paycheck & Readiness

Matches User Intent

"How much can I spend?"

"Am I really okay to retire?"

Why This Works: Paycheck & Readiness

Eliminates Friction

Investment settings

Your investment setting tells your advisor how to choose and manage the funds in your portfolio. Pick the option that best matches how you want your money invested.

All-index (your setting)

Spreads your money across a wide mix of U.S. and international stocks and bonds. A straightforward, low-cost way to stay diversified.

Active/Index mix

A blend of two approaches — some funds are actively managed by experts trying to beat the market, while others simply track it. More potential upside, but slightly more risk.

ESG

Invests in companies that meet certain environmental, social, and governance standards — think sustainability and ethical business practices. Your portfolio is still diversified, with a mix of ESG-screened funds and standard bond funds.

Investment settings are subject to availability and depend on what types of accounts you enroll.

Relatable, human language

"I don't have to translate what I'm seeing"

Why This Works: Paycheck & Readiness

Turns Data into Action

Monthly "retirement paycheck"

Ubiquitous "on track" score

Minor Ideas

Further Design Choices that Boost Clarity for Users

Minor Idea: Audio Reader

 Digital Advisor

Your Year in Review

Exit X

What's in your review?

Highlights from 2025

- ✓ Your [managed accounts](#) in Digital Advisor from January to December 2025.
- ✓ Your **goals**, like retiring in 2063 at age 65.
- ✓ Your **portfolio**, with data on your balances, asset mix, and money movement.

Ideas for 2026

Check for the **light bulb** throughout your review for personalized actions for you.

Why This Works: Audio Reader

Removes the Need to Decode Content

"I don't **get lost** in numbers and small text."

Reduces friction for a large part of the audience

Why This Works: Audio Reader

Makes the Experience Easier to Trust

"If it's hard to read, I assume
I'm **missing something**."

Understanding →
Confidence → **Brand Trust**

Minor Idea: More Informational Tooltips

Investment settings ×

Your investment setting tells your advisor how to choose and manage the funds in your portfolio. Pick the option that best matches how you want your money invested.

All-index (your setting)

Spreads your money across a wide mix of U.S. and international stocks and bonds. A straightforward, low-cost way to stay diversified.

Active/Index mix

A blend of two approaches — some funds are actively managed by experts trying to beat the market, while others simply track it. More potential upside, but slightly more risk.

ESG

Invests in companies that meet certain environmental, social, and governance standards — think sustainability and ethical business practices. Your portfolio is still diversified, with a mix of [ESG-screened](#) funds and standard bond funds.

Investment settings are subject to availability and depend on what types of accounts you enroll.

ESG-screened ×

Funds that focus on companies meeting specific environmental, social, and governance standards.

Why This Works: Tooltips

Easier Real-World Decision-Making

Users should understand **why**
their portfolio changed.

Confusion **erodes**
engagement and trust.

Why This Works: Tooltips

Reduces Anxiety at the Worst Moment

"Why is my balance **less than** what I deposited?"

"Am I **losing money** or is this just how it works?"

Minor Idea: "Continue" Button at the Top

**Reduces unnecessary
scroll depth,**

removing another layer of
friction for YIR users.

Value-Added for the Vanguard Brand

Clarity → Confidence

Confidence → Trust in the Brand

Trust in the Brand → Long-Term Engagement
